

# Evvvy Vaginal Microbiome Test

## Unlocking a critical female biomarker.

The vaginal microbiome is a critical biomarker for female health outcomes across the lifespan. Evvy helps you unlock it.

- The vaginal microbiome is at the root of vaginal discomfort, a **leading reason women seek healthcare advice** in the US<sup>1</sup> (for conditions like bacterial vaginosis<sup>2</sup>, yeast infections<sup>3</sup>, and recurrent UTIs<sup>4</sup>). The standard of care leaves women with >60% misdiagnosis<sup>5</sup> and >50% recurrence rates<sup>6</sup>.
- The vaginal microbiome plays a key — but often overlooked — role in female health by **modulating infection and inflammation in the reproductive tract**, impacting outcomes across fertility<sup>7,8</sup>, menopause<sup>9</sup>, pregnancy<sup>10</sup>, endometriosis<sup>11,12</sup>, STIs<sup>13</sup>, gynecologic cancers<sup>14,15,16</sup>, and more.

### FROM AN EVVY PROVIDER

"Evvvy has completely transformed how we approach women's health in my practice. Their comprehensive testing and tailored treatments have helped my symptomatic patients and those looking to proactively optimize their health."

OBGYN & INTEGRATIVE HEALTH SPECIALIST

## Who Evvy helps.

Patients experiencing **vaginal infections or symptoms**

Patients on a **fertility or pregnancy** journey

Patients going through **perimenopause or menopause**

Patients looking to **proactively optimize** female health

## How it works.

1

**Order a test for your patient:** Evvy offers flexible payment and shipping options to meet your practice's needs.

2

**Collect sample:** Evvy test kits are designed to be self-collected at-home, or taken in the clinic.

3

**Mail sample:** Once received at the lab, PCR results are ready in 1-3 days (with Expanded Panel add on) and mNGS results in 7-10 days.

4

**Receive results & personalized next steps:** Detailed results and personalized next steps (including custom Rx treatments) are sent to both patient & provider.

## Evvvy is the world leader in vaginal microbiome testing.

### ✓ Comprehensive & Validated

- Test for all bacteria & fungi from a single, at-home swab (option to add STI & AMR testing on same swab).
- Validated for clinical use in all 50 states (CLIA, CAP, & CLEP approved).
- Peer-reviewed publication on test methodology & accuracy highlights industry leading sensitivity (93.1%) and specificity (90%).

### ✓ Data-Driven Next Steps

- Personalized, innovative treatment programs — with peer-reviewed publication on efficacy & outcomes.
- Novel scores for patients across the lifespan based on Evvy's vaginal microbiome dataset — the largest in the world.

### ✓ Trusted at Scale

- Trusted by >75k patients & >2k practitioners.
- Industry leading turnaround times (7-10 days).
- Thought leader in women's health & female biomarker discovery.
